

What are the details of this opportunity?

BSc Digital and Technology Solutions is a full Exeter degree, studied over four years through a mix of on-campus residential, e-learning and real-world projects. As the apprenticeship progresses the 2 successful candidates will follow one of several occupational specialisms, each addressing a highly sought-after professional role, such as; **data analysis, cyber security, software engineering, business analysis or IT consultancy.**

The tuition fee for this programme will be paid by TD Securities and the government. Throughout the 4 years you will have paid employment with TD Securities. You will be supported throughout the 4 year degree programme. You will be given study time and residential time off. TD Securities will fund all travel for the residential in Exeter.

To be eligible for this scheme, you will need to have:

GCSE Maths and English Grade C or above and be predicted AAB; BTEC Level Three Extended Diploma DDD; IB 34

The recruitment process will be as follows:

Application deadline - 15th January 2017

Telephone interviews - February 2017

Interviews - March 2017

Conditional offers will be made in April and Exeter University will confirm degree places on A-Level results day in August.
